Scenario:

You are a freshman student at your local college. You moved into your dorm this past week and don't really know anyone. So, you want to make some friends and do some things you enjoy. You heard about this new up and coming app that lets you do that.

Task 1: Load up the app and make an account. You can use your real information if you want.

Task 2: After you sign up, find the screen where you search up by hobbies and free time. Search up gaming and 4:00 pm.

Task 3: Try joining the gaming club and wait for an invite. Which I will send after you request to save time.

Notes:

Changes:

Add a button that lets you great your own club

Instead of having a drop-down box for the clubs, let you type in keywords and clubs come up

Add a messaging system so you can talk to club leaders or other people on the app. Something like Instagram.

Same:

Keep the login type the same.

Keep the calendar format when seeing dates.

Keep the invite system the same.
